## Terms and conditions

Naturally Perfect Photography shall reserve the times and dates agreed upon once the retainer (\$500) has been paid and client signs and returns the terms of the agreement.

If the customer wishes to cancel the booked date, deposits are non refundable unless Naturally Perfect Photography is able to fully replace the date with another booking of equal or higher value.

If sickness or injury results in Naturally Perfect Photography not able to photograph your wedding, a replacement professional photographer selected by Naturally Perfect Photography will be appointed at the expense of Naturally Perfect Photography.

If Naturally Perfect Photography's services are required for more than 5 hours a meal is to be provided at the customer's expense.

"All day" refers to a total service time of 12 continuous hours unless otherwise specified. The customer may not sell or distribute any images to any commercial or publishing body without written permission from Naturally Perfect Photography. Naturally Perfect Photography reserves the right to use all images for advertising or display.

Customers will receive a USB flash drive of edited pictures. Edited images are provided on USB in the "Jpeg" format. A fee may apply if the customer requires the images in any other file format.

If the customer requires the original unedited files, these can be provided upon request. Original unedited files are in the "RAW" format. A fee may apply if the customer requires these images in any other file format.

Images are colour balanced and the brightness/contrast levels are set to average settings. They are set as close as possible to how a healthy human eye perceives colour and tone.

Editing and enhancement of images includes colour alteration, (e.g. black and white / sepia conversions), retouching (e.g. skin tone and blemishes), and effects. Additional editing work such as major image alterations (e.g. background or people removal) will be negotiated on a per image basis and may attract an additional fee.

Images provided on USB flash drive should be printed using a professional printing service. If customers wish to print images at home they should have some digital photography skills and knowledge (particularly of colour management), to make the necessary colour and brightness/contrast adjustments to suit their printer and monitor. It is generally considered to be much cheaper and easier to use a professional service.

Customers should be aware that the images supplied on disc are of very high quality and therefore very large files. A fast computer and appropriate software may be required for trouble-free viewing.

All customers are provided with a copy of their images reduced in file size and quality for the purpose of e-mailing. Customers should generally have no problem viewing this set of images with a basic home computer.

The USB flash drive format is not guaranteed for life. It is the customer's responsibility to store and care for their data correctly. Making copies at regular intervals is a good safeguard. If customers are having problems viewing their images, they should refer to the computer user manual or contact a computer supplier. If the USB is supplied faulty, please return it to us and a replacement will be sent.

Production time for image proofs is 3 weeks. Finished images will be delivered within another 3 weeks (5-6 weeks in total). Priority express orders, including the request of images for e-mailing, websites, thank you cards etc. will attract a fee. The price for this service varies depending on the request and time involved.

The balance of payment is required four (4) weeks prior to the booked date of photography services (the wedding day). No part of any order will be delivered until the balance is paid in full.

The terms of this agreement are accepted by these parties
